IVC Academy: Learn how to safely and effectively administer IV Vitamin C in your practice.

In 1990, Dr. Hugh Riordan announced the inception of REC/NAC – Research Encompassing Novel Approaches to Cancer – with the intent of discovering underlying causes of cancer and finding ways to treat cancer in a non-toxic fashion.

Now, 29 years later, The Riordan IVC Protocol for Cancer is well known in the integrative and orthomolecular medicine community and is commonly used as an effective adjunct to conventional oncologic therapy. Although the access to trained physicians and clinics has grown, there is still an overwhelming number of providers who are looking for guidance on using IVC in their practice.

1. What is the best measure of IVC effectiveness?
2. Should other nutrients be added to the IVC solution?
3. Could alternative rates of infusion improve outcome?
4. What types of cancers respond best to IVC therapy?

If any of these questions resonate with you, the IVC Academy is the perfect opportunity to step away from your daily schedule and focus on learning how to implement or strengthen the use of IVC in your practice. **Learn from the experts who helped research, develop, teach, and use the IVC Protocol every day.**

This event is limited to 60 participants. Regular price: \$595

ACADEMY SPEAKERS

CHRIS BRANNON, RN, BSN

*Director of Clinical Services,
Riordan Clinic*

Chris is a native of Mulvane, KS and joined the Riordan Clinic in May of 2012 as a nurse focusing on the administration of IV Vitamin C and various therapies. In 2014 he was promoted to Clinic Manager after having served as interim Clinic Manager for 9 months. In 2018 Chris was promoted to the Director of Clinical Services of the Riordan Clinic.

CHARLES HINSHAW, MD

*Director, Bio-Center
Laboratory*

While practicing hospital pathology in Hutchinson, Kansas, Dr. Hinshaw was asked by Dr. Hugh D. Riordan to help establish a new laboratory in Wichita to be expressly dedicated to testing patients for the levels of essential nutrients needed to optimize good health. This relationship became a full-time pursuit from 1979 – 1983 at what is now known as the Riordan Clinic.

RON HUNNINGHAKE, MD

*Chief Medical Officer,
Riordan Clinic*

A world-renowned expert in IV Vitamin C, Dr. Ron will speak directly to the history and protocol of IVC that is used around the globe. He has presented more than 300 lectures dealing with all facets of nutrition, lifestyle, and optimal health. He has co-authored three books on subjects including inflammation, energy-boosting supplements, and how to stop pre-diabetes.

THOMAS LEVY, MD, JD

Cardiologist and Author

After practicing adult cardiology for 15 years, Dr. Levy began to research the pronounced ability of properly-administered vitamin C to neutralize this toxicity. He has now written eleven books, with several addressing the wide-ranging properties of vitamin C in neutralizing all toxins and resolving most infections, as well as its vital role in the effective treatment of heart disease and cancer.

NINA MIKIROVA, PHD

*Director of Research,
Riordan Clinic*

Nina Mikirova, PhD is the Director of Research at the Riordan Clinic and graduated from Moscow State University in Russia with a PhD in physics and mathematics. After 15 years as the senior researcher and chief engineer-designer at the Institute of Bio-Medical Problems in Russia, she joined the Riordan Clinic in 1997.

LUCAS TIMS, ND, FABNO

*Naturopathic Oncologist,
Riordan Clinic*

Throughout Dr. Lucas' practice, he has provided Integrative Medicine support for thousands of cancer patients at multiple Cancer Treatment Centers of America hospitals and clinics. As a board-certified, Naturopathic Oncologist, Dr. Lucas is an expert in how to utilize natural therapies to support patients during any phase of treatment or care setting.
