### FEATURED LAB PROFILE

## Mega Profile

Nutrient testing is at the core of what we do here at the Riordan Clinic. Every person is biochemically unique, we all have different nutritional needs based on hereditary factors, environment, diet, lifestyle choices and stage of life. The Bio-Center Laboratory's signature Mega Profile focuses on the direct measurement of nutrients and their clinical relevance in fighting or preventing disease. Results from the Mega Profile can also help direct a daily nutrition and supplementation plan for your specific needs. **Don't just guess on what supplements you need - make decisions based on real data!**
